Preparatory cycle in computer science

The units studied and learned throughout the course:

- Linux and operating system
- object-oriented programming
- Algorithms & Data Structures
- Computer architecture

2021 - Now

ESI (ex INI)

Graduate cycle in computer science

The units studied and learned throughout the course:

- Data base
- Networks
- High performance computing
- Numerical analysis

Projects

04/2021 - 07/2021

Multidisciplinary Project (2CP)

Logement-ESI

- The project was the implementation of a web application for the administration of my university.
- I collaborated on this project as a front-end developer (team of 5 people).

04/2022 - 06/2022

Transversal Project (1CS)

Rehlati

- This is a response to an offer from the Ministry of Tourism in Algeria, so we offer our e-Tourism solution.
- I collaborated on this project as solution architect (team of 7 people).
